

CALCULATOR REQUIREMENTS

The VTC Mathematics Department requires all entering Vermont Technical College Students to possess, for use in Mathematics class, a contemporary graphing calculator.

If your major course of study is in the engineering program, you will need to purchase a graphing calculator. For all other majors, the TI83 calculator is recommended.

If you should have any questions, you can notify John Knox at 802-728-1204 or email JKnox@vtc.edu.

Calculators are available for purchase in the College Bookstore.
